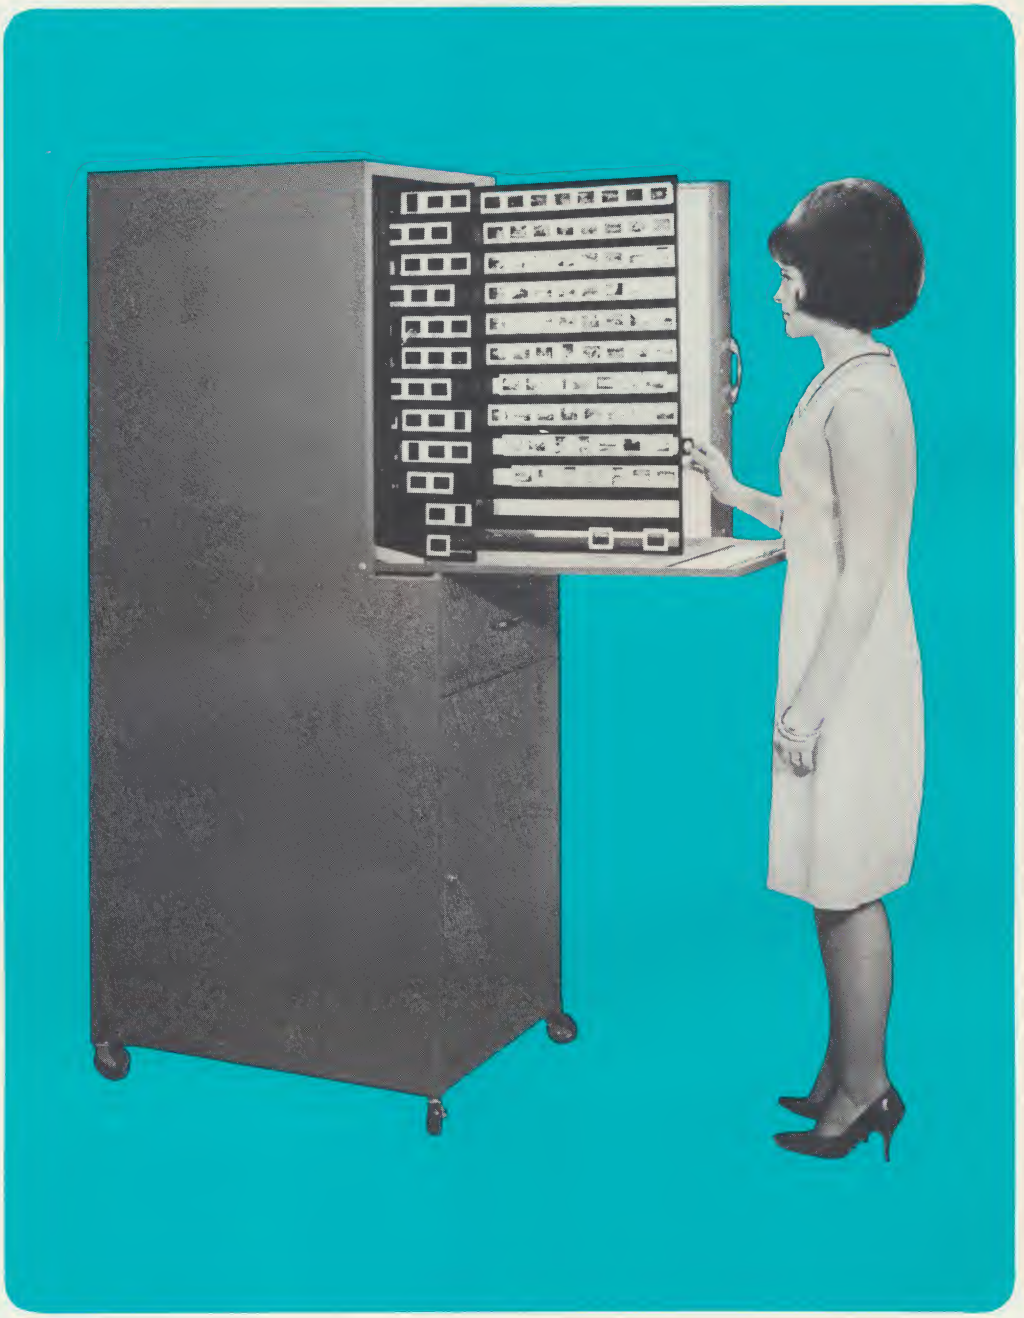
MULTIPLEX

All Steel Filing Cabinets for Photo Slides



SCHOOLS & COLLEGES • HOSPITALS • BUSINESS • INDUSTRY • LABORATORIES • GOVERNMENT DEPARTMENTS

MANUFACTURED BY

MULTIPLEX DISPLAY FIXTURE COMPANY
WARNE & CARTER AVENUES • ST. LOUIS, MISSOURI 63107

The slides you use in your daily routine are an integral part of your well planned program for getting things done on time.

Slides are necessary. Slides are costly. Slides are important. Slides must be protected.

The Multiplex Company with over sixty-five years of continuous production, close cooperation with slide users and a research study of what is needed to do a good job a little better, proudly presents for your consideration, a complete line of all-steel Cabinets with many new and distinctive features including a fluorescent lighted View Box.

With a Multiplex Cabinet in your office, study, laboratory, classroom or workshop, you are assured every slide has maximum protection against fire, damage, misplacement, theft or unauthorized examination.

At the same time each slide has its own place in the Cabinet to help you quickly assemble a group for a particular lecture, study or discussion. Every slide is fully "viewable" and at fingers tips.

Doctors, Educators, Lecturers, Technicians, those in the arts and industry—and now the space age scientists —all know the value of slides and the necessity of keeping them conveniently and safely filed to save time of preparation, inspection and selection.

No wonder Multiplex all-steel Cabinets are A-1 priority by those who must conserve valuable time and eliminate all inconveniences when certain slides are wanted. Seven individual Cabinets are ready to help you. This is your complete 16 page catalog LS-266 with full illustrations, details, specifications and prices.

1. All-steel Multiplex Slide Cabinets serve well in Hospitals, Medical Schools, Clinics, Laboratories and in private professional offices.

2. No. 41 Cabinet requires minimum floor space. May be placed and used anywhere. Provides proper care for growing slide collections.

3. No. 52 Cabinet requires minimum space. May be placed on table, counter, chest of drawers or wherever space permits. Slides are easily filed to a plan or program.

4. Quick reference and study of slide data where slides prove of greatest value has established Multiplex Cabinets as a necessary part of Medical Schools, Hospitals, and Laboratories.

5. These four No. 50 Slide Cabinets have a combined capacity of 8320 slides 4 x 3¼" or 27,040 slides 2x2" or any combination of both size slides.

6. Roller mounted base moves this No. 51 Slide Cabinet to any location. Base is an optional feature. Cabinet may be removed from base and used on table.

INSERTING SLIDES

SPECIFICATIONS No. 50 CABINET AND FEATURES

Cabinet—Heavy gauge sheet steel covers a steel tubing framework. Sides are straight to give modern appearance. Specially designed door provides level shelf on which slide holding steel frames rest when in position for viewing slides. Compression springs open and close the door easily.

Base—Fitted hinged door opens on left side to give easy access to storage or utility space 23½″ wide, 30½″ deep and 31″ high. Base mounted on roller bearing casters. Locking feature keeps Cabinet "set" in one location.

Size—Cabinet measures 23″ wide, 24¾″ deep and 71″ high overall. *View Box adds 3¾″ to width.

Capacity—2080 slides 4x3¼″ or 6760 slides 2x2″ or any combination arranged in 52 steel slide holding frames.

Locking Device—High grade, tubular lock fitted into door. Two keys furnished. Separate locks for working drawer or base storage section available at time order is placed and at nominal cost.

Slide Frames—Each steel slide holding frame 22″ wide by 28¾″ high holds either 40 slides 4x3¼″ or 130 slides 2x2″ (the same frames will not hold both sizes). Slides are easily inserted and removed. This is new capacity.

Inserting Slides—Each slide is inserted in the top cross channel and then set into the lower channel. The slide is safely filed, easily removed and quickly returned to its proper place.

Diffusing Screen—Each Cabinet has a diffusing screen, same size as the steel slide holding frames. Screen serves as a background for viewing slides when *View Box is not ordered.

Slide Frame Pulls—Specially designed slide frame pull attaches to each slide holding frame in one of three different positions. By inserting finger into this "pull" you quickly bring forward into viewing position each frame, one at a time.

Index—Slides are cross indexed alphabetically and numerically. Index reference mounted on inside of door. A numbering strip placed in front of slide frames helps to quickly find the desired slide.

Working Drawer—Spacious, easy sliding utility drawer 20½″ wide, 30″ long and 4¼″ deep. Chrome plated handle.

Finish—Cabinet and base finished in durable oven baked-on office furniture grey, crinkle finish. Lock and handle chrome plated. Slide holding frames ebony enamel.

*VIEW BOX — Optional Feature

The new fluorescent lighted View Box glides into position in ball bearing suspension upper and lower tracks which fasten flush with right hand side of Cabinet. A soft light vividly illuminates slides in each steel slide holding frame. Size of View Box 22¼″ wide by 30½″ high and 3″ deep. Office furniture grey, crinkle finish. An extra 2x2″ steel slide holding frame is included to replace standard diffusing screen and to increase the slide capacity of the Cabinet.

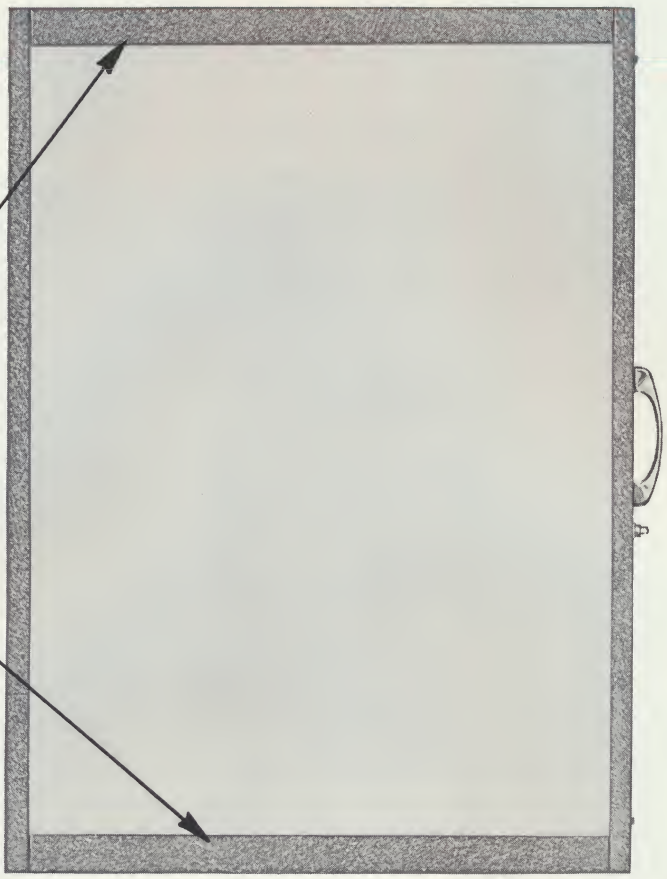
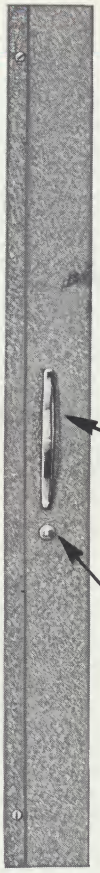
***VIEW BOX — Optional Feature**

The new fluorescent lighted View Box glides into position in ball bearing suspension upper and lower tracks which fasten flush with right hand side of Cabinet. A soft light vividly illuminates slides in each steel slide holding frame. Size of View Box 22¼" wide by 30½" high and 3" deep. Office furniture grey, crinkle finish. An extra 2x2" steel slide holding frame is included to replace standard diffusing screen and to increase the slide capacity of the Cabinet.

NEW FLUORESCENT LIGHTED

VIEW-BOX

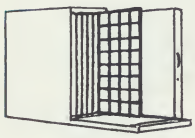




Heavy gauge steel provides a safe housing for fluorescent lights, electrical wiring and plexiglass diffuser.

Chrome Plated handle glides View Box into viewing position.

On and off toggle switch assures proper lighting only when needed.



OPEN

CLOSED

PROVIDES MAXIMUM ELECTRIC LIGHT, EVENLY DIFFUSED, FOR EVERY SLIDE.

1 The all-steel fluorescent View Box fits on the right side of Multiplex Cabinets Nos. 50, 51, 52, 39, 40, 41 and 42. A few minutes time and ordinary tools are all that you need to give your Cabinet the right light for viewing slides.

2 The View Box varies slightly in measurements for each Cabinet. Check specific sizes under specifications. Each View Box contains two long lasting fluorescent lamps. A soft diffused light vividly illuminates every slide.

3 Easy to operate View Box glides into position in the ball bearing suspension upper and lower plated guide tracks, which fasten flush with the Cabinet. Front and back guide stops keep View Box in proper location at all times.

4 Light is controlled at proper height by push button switch on front edge of View Box just below chrome plated handle. Ten foot cord connects with electric outlet. The white translucent sheet diffuses light correctly and evenly.

5 It costs so little to add so much to the many conveniences and services of a Multiplex all-steel slide Cabinet. Be sure to specify the new fluorescent View Box for your new Nos. 50, 51, 52, 39, 40, 41 and 42 Cabinets.

Here is a happy note to you who are now using Multiplex all-steel slide Cabinets. You can easily and quickly attach to the side of your Cabinet this new fluorescent lighted View Box. Nominally priced to assure you the many benefits found in this controlled light that correctly illuminates every slide.

MULTIPLEX ALL-STEEL CABINETS USED EVERYWHERE

Wherever slides are used in teaching, laboratory, lecture or discussion, there you will find a Multiplex all-steel Cabinet doing a good job.

Only a Multiplex Cabinet provides the right kind of visible filing space plus maximum safety and convenience. Every slide has its own place in the Cabinet. Each slide becomes instantly alive before a diffusing screen for accurate selection as part of a study, lecture or consultation. Slides are easily removed and returned to their proper filing place. Every Cabinet gives maximum protection against fire, misplacement, breakage, theft and unauthorized use.

You have a choice of seven individual Cabinets each designed to meet the certain needs of the slide user. You adopt a Cabinet to satisfy your present requirements. You buy only what is necessary to file and protect your present collection. As new slides become available, you simply add additional steel slide holding frames. You may even start a new Cabinet.

Users of Multiplex all-steel Slide Cabinets include Universities, Colleges, Technical, Trade, and Business Schools, Hospitals, Clinics, Sanitariums, Space Age Projects, Industrial Firms, Government, State and City Departments, those in private practice and endeavors and many others. If you are not using a Cabinet, you will want to entrust your valuable slides to one of these seven tailored-to-fit-your-needs Multiplex all-steel Cabinets. Thousands of slide users know through experience the value of convenient arrangement of slides, the protection of fire resistant steel and the time saving element of having so many slides at fingers tips for quick inspection, reference and use. We shall be privileged to work with you and to serve you promptly.

No. 42 ALL-STEEL SLIDE CABINET

Cabinets No. 41 and No. 42 have the same size slide holding sections 9½″ wide, 24¾″ deep and 22¼″ high. No. 41 includes the roller mounted base. No. 42 (without base) is preferred for placement on counter, table, filing cabinet, etc. The base may be added to the No. 42 at any time as a component part.

Several No. 42 Cabinets may be placed side by side and others added as new slides become available. No. 41 Cabinet especially well suited where conditions require moving about to other locations.

Slides play a most important part in the daily routine of those serving in Hospitals, Clinics, Medical Schools, Universities and Colleges; also those in private practice.

Slides alone can quickly and accurately present recorded data about a case history, a specific fact or a part of a complete story. That is why an ever increasing number of slides are made and used and filed for future use in our daily practice, teaching and research.

These slides must be visibly filed for quick reference, accurate selection, and proper attainment. They must also be protected from damage, misplacement and theft. You have a choice of seven all-steel Cabinets designed and built to give your valuable slides a safe place, a convenient filing arrangement and a reference system to save you much time, effort and patience.

SPECIFICATIONS Nos. 41 & 42 CABINETS AND FEATURES

Cabinet—Heavy gauge sheet steel covers a reinforced framework of Cabinets Nos. 41 and 42. Sides are decoratively paneled. Specially designed door provides a level shelf on which slide holding frames rest when in position for viewing. Compression springs open and close door easily.

Base—Portable base of round, heavy wall steel tubing fits into two base castings mounted on four easy rolling casters. Special locking feature keeps Cabinet "set" in one location.

Size—No. 41 and No. 42 all-steel Cabinets are 9½" wide, 24¾" deep, and 22½" high. No. 41 floor Cabinet includes base. Overall height with base 66". View Box adds 2½" to width of cabinet.

Capacity—600 slides 4x3¼" or 1800 slides 2x2" or any combination arranged in 20 steel slide holding frames.

Locking Device—High grade tubular lock fitted into door. Two keys furnished.

Slide Frames—Each steel slide holding frame 22" wide by 21⅝" high and holds either 30 slides 4x3¼" or 90 slides 2x2" (the same frame will not hold both sizes). Slides are easily inserted and removed.

Inserting Slides—Each slide is inserted in the top cross channel and then set into the lower channel. The slide is safely filed, easily removed and quickly returned to its proper place.

Diffusing Screen—Each Cabinet has a diffusing screen, same size as the slide holding frames. Screen serves as a background for viewing slides when View Box is not ordered. Size of View Box 22½ x 22 x 2½".

Slide Frame Pulls—Specially designed slide frame pull attaches to each slide holding frame in one of three different positions. By inserting finger into this "pull" you quickly bring forward into viewing position each frame, one at a time.

Finish—Cabinet and base finished in durable oven baked-on office furniture grey, crinkle finish. Steel slide holding frames in oven baked-on ebony enamel. Lock and handle chrome plated.

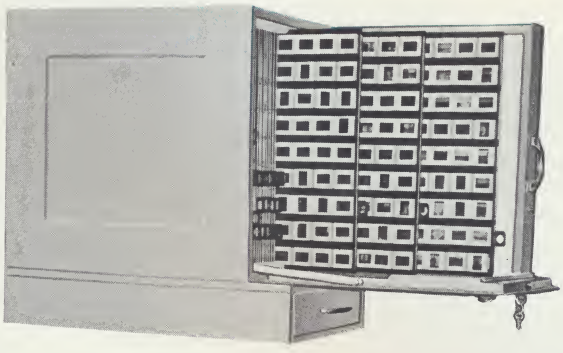
CUSHIONED SPRING DOOR



No. 40 ALL-STEEL SLIDE CABINET

The Cabinet or slide holding section of No. 39 and No. 40 is the same. No. 39 includes roller mounted base. No. 40 is Cabinet only without base although base may be added later.

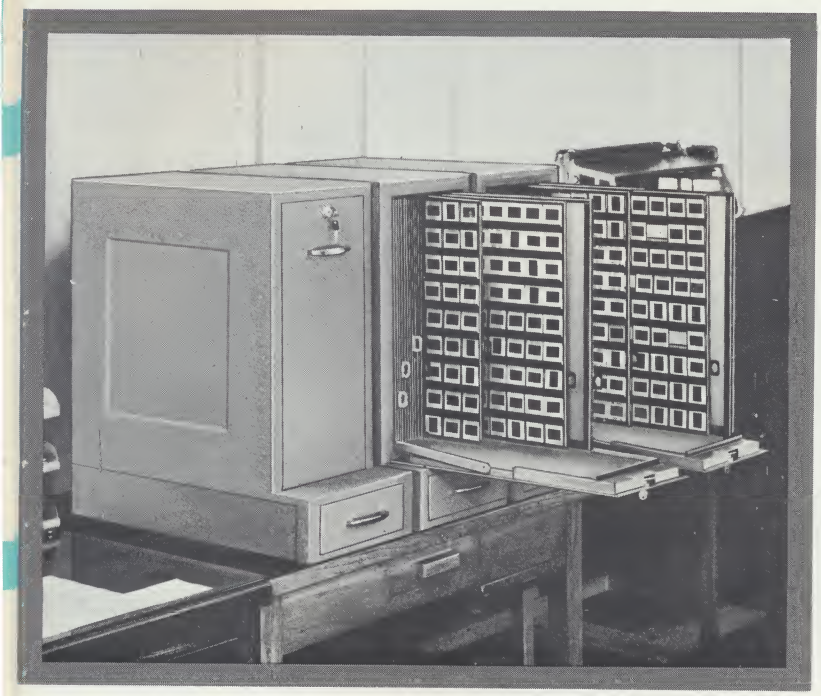
Complete Cabinet and base—outside and inside—finished in oven baked-on office furniture grey. Grey harmonizes with any color scheme or interior decor. Steel slide holding frames finished in ebony enamel.

Check the many features and the specifications of this practical Cabinet. You will want to use the No. 39 or No. 40 in your private office, clinic, workshop or laboratory.

Known as the "personal" Cabinet for Doctors, Professors, Technicians, Lecturers, or professional men or women, the No. 39 desk height all-steel Cabinet with roller mounted base has been widely accepted.

The No. 40 is similar in style and size, but without the base for placement on table, desk, chest of drawers, low-boy filing cabinet, etc. The base may be added later.

These two Cabinets have been especially designed to serve a specific and important need in a most satisfactory way. They have no equal for personal office use. Each holds a generous number of slides in 4x3¼" or 2x2" sizes or some of each. Ideal for Dentists, Specialists, County Agents, social sciences and in the many departments of business, industry and now, the space age.



SPECIFICATIONS Nos. 39 & 40 CABINETS AND FEATURES

Cabinet—Heavy gauge sheet steel covers reinforced framework of Cabinets Nos. 39 and 40. Sides are decoratively paneled. Specially designed door provides a level shelf on which slide holding frames rest when in position for viewing. Compression springs open and close door easily.

Base—Fitted hinged door opens on left side to give easy access to storage or utility space 16¼" wide, 28½" deep, 29¼" high. Door has tubular lock. Base mounted on easy rolling casters. Locking feature keeps Cabinet "set" in one location.

Size—Cabinet measures 16¼" wide, 24½" deep, 28" high. When placed on base, overall height 56". No. 39 floor Cabinet includes base. View Box add 3" to width.

Capacity—1080 slides 4x3¼" or 3240 slides 2x2" or any combination arranged in 36 steel slide holding frames.

Locking Device—High grade tubular lock fitted into door. Two keys furnished.

Slide Frames—Each steel slide holding frame 22" wide by 21⅝" high holds either 30 slides 4x3¼" or 90 slides 2x2" (the same frame will not hold both sizes). Slides are easily inserted and removed.

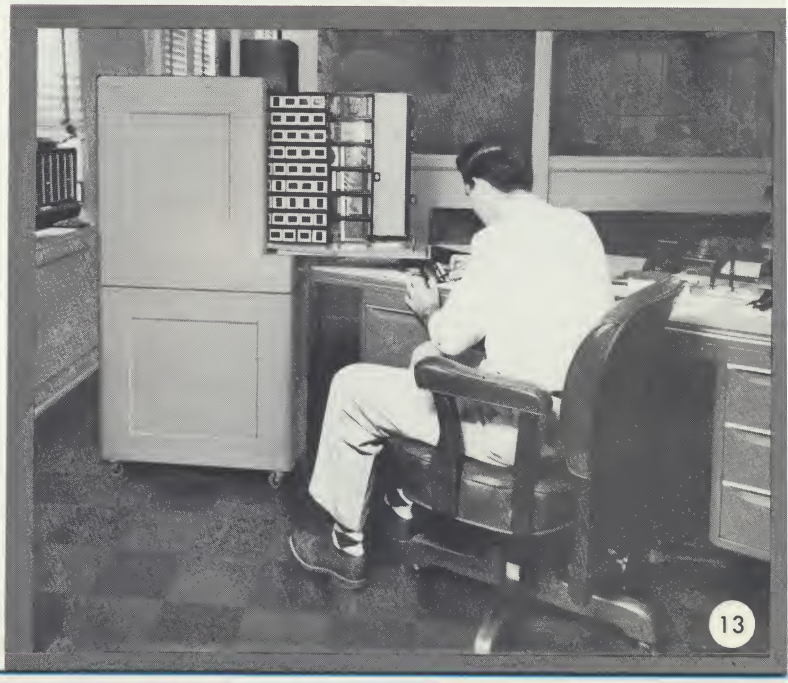
Inserting Slides—Each slide is inserted in the top cross channel and then set into the lower channel. The slide is safely filed, easily removed and quickly returned to its proper place.

Diffusing Screen—Each Cabinet has a diffusing screen, same size as the slide holding frames. Screen serves as a background for viewing slides when View Box is not ordered. Size of View Box 24½ x 24½ x 3⅛".

Slide Frame Pulls—Specially designed slide frame pull attaches to each slide holding frame in one of three different positions. By inserting finger into this "pull" you quickly bring forward into viewing position each frame, one at a time.

Finish—Cabinet and base finished in durable oven baked-on office furniture grey, crinkle finish. Steel slide holding frames in oven baked-on ebony enamel. Lock and handle chrome plated.

Working Drawer—Spacious, easy sliding utility drawer 14" wide, 27¾" long, 2¾" deep.



VISUALIZE THE EDUCATIONAL MESSAGE WITH THE ALL-PURPOSE MULTIPLEX

Swinging wing-panel Multiplex is standard equipment in many school systems for classrooms, shops, laboratories, museums, libraries and wherever material of a flat nature is visibly posted for reference and use.

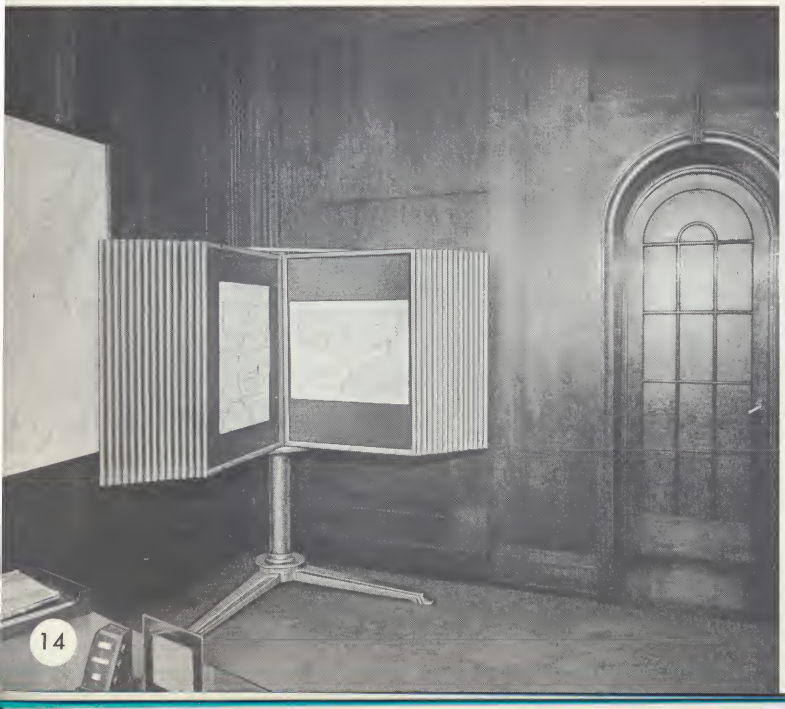
Just like turning the pages of a large loose-leaf book. Material posted to both sides. Everything arranged to a plan for a purpose. Adjacent surfaces open to a wide angle, practically flat. All material "seeable" from any angle.

Many styles and sizes of Multiplex to give you the right amount of display space. Choice of fillers, choice of finishes, choice of equipment. A Multiplex to meet any specific need.

Auxiliary teaching material plays an important part in today's educational program. Modern teaching methods plus visible displays produce a practical way to show much material in a compact, small area. Always at fingers tips for study, immediate reference and presentation.

This supplementary material adds much to the overall teaching plan. It holds the interest of the entire class. It centers attention on one point. As the lesson, study or discussion progresses, a new group of material swings into full view, page by page, step by step.

Glass carrying wing-panels are recommended for hard-to-replace material, such as class pictures, important papers, etc.



MULTIPLEX

FOR EVERY DISPLAY NEED

These illustrations of Multiplex in use show just a few of the many practical applications of this modern display method.

In the classroom, workshop, laboratory, museum, library or study there are particular Multiplex well suited to do a good job just a little better. For example, blackboard and green chalkboard for classrooms; magnetic steel plate fillers for workshop; glass covered wing panels for museums; Multiplex displays for libraries, laboratories or lecture purposes.

In the X-Ray, research, pathology and other departments of Hospitals, medical and nurses training schools, where slides are used and referred to frequently, Multiplex all-steel Cabinets provide convenient housing, safety and protection.

Medical schools, laboratories and science research visibly post their valuable papers, charts, graphs, expensive pictures, books and other material to swinging wing-panel Multiplex. Here everyone may see and use in their own way material that may not be available in any other manner. Glass covered displays offer protection from damage, misplacement or theft.

Nurses training schools use Multiplex for keeping class photos intact through the years; also educational data used in class, laboratory, lecture, study or research.

The space age with its timely data and need for visual displays has quickly added Multiplex to its most wanted equipment for doing the job at hand on time.

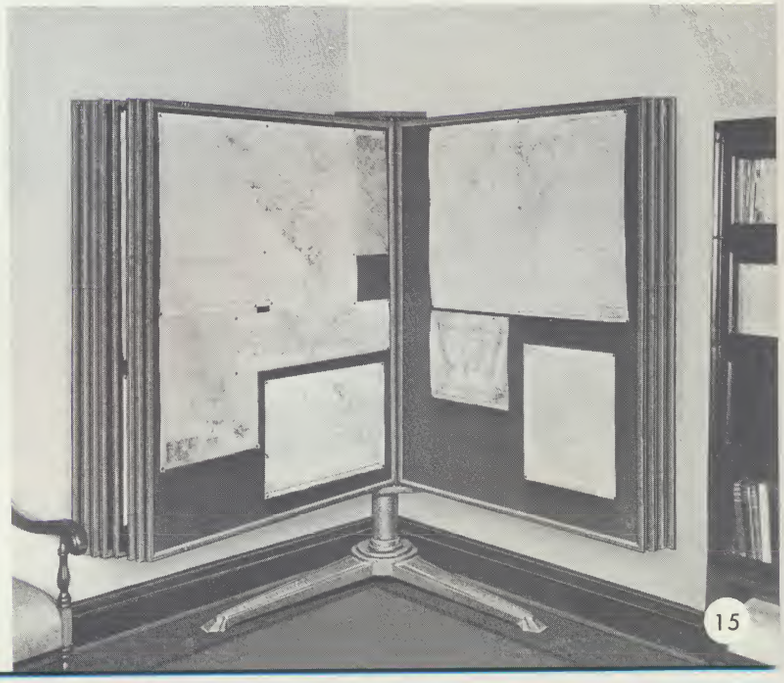
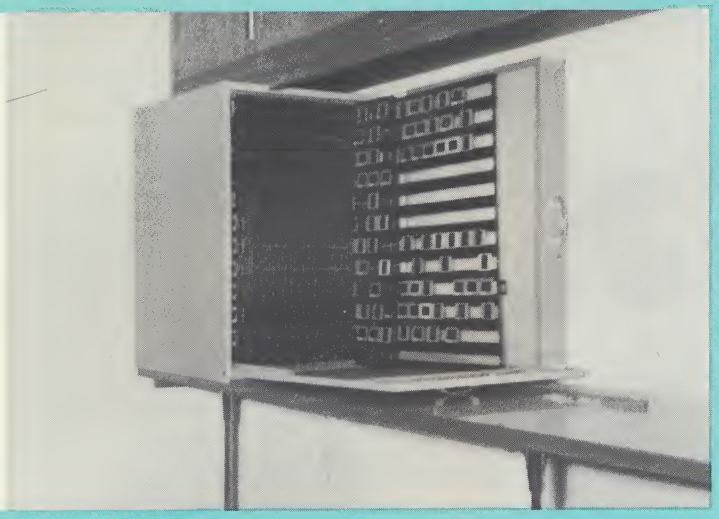
T-3 CHART STAND

T-2 CHART STAND

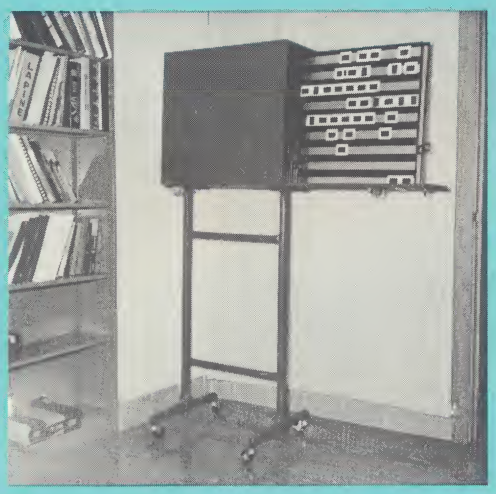


SWINGING WING-PANEL DISPLAYS AND ALL-STEEL SLIDE CABINETS



No. 52 Slide Cabinet moves easily into working and viewing position alongside office desk. Convenient height assures maximum efficiency.

No. 39 Slide Cabinet with working drawer and spacious utility section fits into any office or department setup. Holds a maximum number of slides 4x3¼" or 2x2" or some of each.



This No. 41 Slide Cabinet is only partially filled, but it will expand to provide safe housing for many more slides as they become available.

Looking "into" a No. 50 Slide Cabinet where 52 sliding frames will hold 2080 slides 4x3¼" or 6760 slides 2x2" or any combination of both sizes.

The versatility of self-supportable floor Multiplex is shown with this Museum using a No. 64 alongside wall and a No. 65 in corner. Fourteen panels in each unit.

Art schools, art departments, and art libraries find swinging wing-panel Multiplex most helpful in providing concentrated display space for so many sketches, drawings, and pictures.

Mr. T. Nelson, Consultant
P.O.Box 1546
Poughkeepsie, New York 12603

Dear Mr. Nelson:

Thank you for requesting information on Multiplex Slide Filing Cabinets.

Catalog with price list is enclosed featuring the seven models of cabinets available. Cabinets are listed with frames for 4x3-1/4" slides also with frames for 2x2" slides. Some may be had for each size slide if desired, just be sure to specify how many are wanted for each size. Also if the capacity of frames for the cabinet are not needed now, start with just a few and add others as your collection grows.

The fluorescent lighted View Box (light diffusing screen) shown on page 8 is an optional feature now available on all cabinets and is a definite added asset in that the cabinet may be placed anywhere with the assurance of proper lighting for viewing and selecting the slides wanted.

Your order will be appreciated and have careful attention, or any further information wanted will be sent promptly upon request.

Yours very truly,

MULTIPLEX DISPLAY FIXTURE CO.

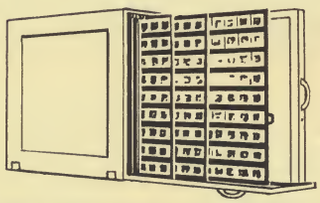
With 20 slide frames to hold 600 slides 4x3¼"	**180.25**	**152.50**

Cabinet only **$57.50**
Portable Base ...**$27.75**
(When ordered separately **add $3.00** packing charge).

Steel frames, capacity, 30 slides, 4x3¼", each.....**$4.75**
Steel frames, capacity, 90 slides, 2x2", each..... **4.75**



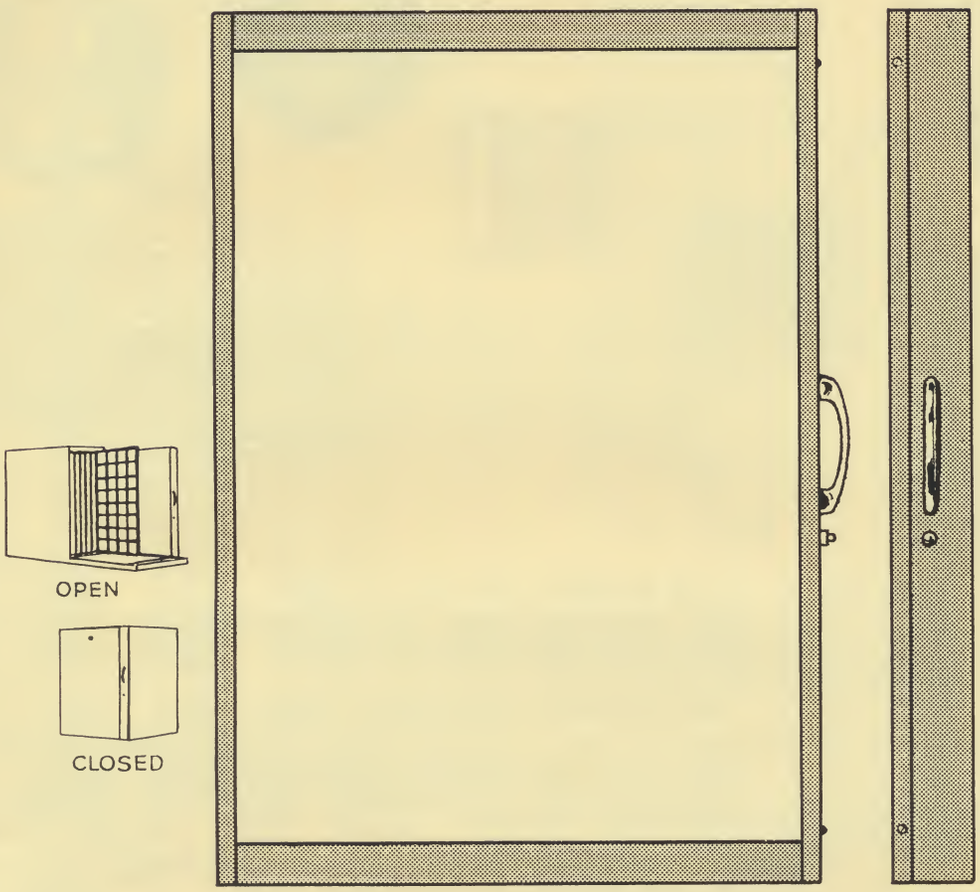
Base: Roller mounted steel tubular base may be added to the No. 42 Slide Cabinet at any time. This will make it a No. 41 Cabinet as illustrated above. Cabinet is easily removed from base for placing on table, counter, or filing cabinet.

View Box: The new Multiplex fluorescent lighted View Box fits on right hand side of Cabinet. Roller mounted, moves easily behind slides for quick and accurate selection. Special carrier fastens to top of Cabinet to hold View Box. Complete directions furnished.
One 2x2" slide holding frame included.....**$87.50**
Packing charge of $1.50 when less than six slide holding frames only are ordered.
TERMS: NET 30 DAYS. SHIPMENT F.O.B. ST. LOUIS, MISSOURI.

Should you have a collection of slides in other sizes, for example, 2¼ x 2¼", 2½ x 2½", 2¾ x 2¾", 4 x 5", or 5 x 4", we will furnish slide holding frames and at nominal cost. For further data with prices on any Cabinet to hold the special size slides, please write and give full particulars.

NEW FLUORESCENT LIGHTED

VIEW-BOX



PROVIDES MAXIMUM ELECTRIC LIGHT, EVENLY DIFFUSED, FOR EVERY SLIDE

The all-steel fluorescent View Box fits on the right side of any Multiplex Slide Cabinet. A few minutes of time and ordinary tools are all you need to give your cabinet a right light for viewing slides.

Two long lasting fluorescent lamps assure a soft diffused light which vividly illuminates the slides. The light is controlled by a push button switch on the front edge of the View Box. A ten foot cord connects with electric outlet.

It costs so little to add so much to the many built-in conveniences and services of a Multiplex all-steel Slide Cabinet of your choice. Be sure to specify a fluorescent View Box for your new Cabinet or for any Cabinet you may now have in use.

View Box for numbers 50, 51 and 52 Cabinets..... **$89.75**
View Box for numbers 39 and 40 Cabinets..... **$88.50**
View Box for numbers 41 and 42 Cabinets..... **$87.50**

TERMS: NET 30 DAYS.
